**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a redirecting server on each of a plurality of nodes that receives incoming phone calls from a switch. Sumsion et al '865 discloses in col. 3, lines 19-22, that a redirector on the client nodes will receive input and output requests from the interpreter and directs the requests either to the local operating system or to the server node. Nowhere is it disclosed that a redirect server will receive an incoming call from a switch. No obvious combination of references found would have a person having ordinary skill in the art to make and use applicant's apparatus as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Creighton H. Smith whose telephone number is 571/272-7546. The examiner can normally be reached on M-F, alternate Fridays off.
